

Practitioner Referral Packet

Independent systems-biology consulting for complex chronic gut, mast-cell, and post-viral cases. Designed to support — never replace — your clinical work.

What BiomeLogic is

- An independent systems-biology consultancy.
- Reads a case against the Host Capacity Model (HCM).
- Produces a written mechanistic summary with discussion questions for the patient's care team.
- Tags claims by evidence tier (established biology, literature-supported mechanism, HCM interpretation, hypothesis, speculative).

What BiomeLogic is not

- Not a clinical practice. Mohammed Attallah is not a licensed clinician.
- Does not diagnose, treat, prescribe, or order labs.
- Does not recommend supplement protocols or dosing.
- Does not direct or override clinical care.
- Does not promise outcomes.

Scope boundaries

Educational only. Anything resembling diagnosis, prescription, or care planning remains the exclusive domain of the patient's licensed clinicians. Where the model may not apply (acute care, structural disease, primary autoimmune, primary neurological/vascular drivers), the written summary states this.

Sample report structure

- Presenting picture and timeline
- Axis-by-axis read (barrier, bioenergetic, ecological, mast-cell, autonomic, mitochondrial)
- Candidate upstream mechanism / host-capacity bottleneck
- Contradictions and uncertainty
- Testing-priority logic for clinician discussion
- Discussion questions for the patient's licensed care team

Fictional sample: biomeLogic.net/sample-mechanistic-report

How collaboration works

- Patient enters through a free Gate 1 fit screen at biomeLogic.net/request-consultation.
- If accepted, the patient submits the full case and books the mechanistic consultation.

- With patient consent, the written summary can be sent directly to your office.
- With patient consent, you may be looped in on a follow-up call.

Privacy

Patient-submitted information is used only to produce the mechanistic summary for that engagement. Records are not shared with third parties. Patients may request deletion at any time. Full handling: biomelogic.net/privacy-health-data

Clinician discussion framing

The deliverable is intended for review and discussion. Clinicians may agree, modify, or disregard any part of it. Disagreement is welcome and useful. Biomelogic does not override clinical judgment.
